Inhalt

The AI wave is hitting societies around the globe. Therefore, it is of tremendous importance to understand how AI will shape individuals and societies. To better understand how AI will influence our well-being the IMPACT framework has been put forward to show which variables are of relevance to understand the AI-well-being-complex. Of note, the acronym IMPACT stands for the Interplay of Modality, Person, Area, Country/Culture and Transparency variables, which will be focused upon in the presentation.
